LABEL

There are as many ways of making a label, as there are people making them. Some quilters use preprinted labels (available at many quilting notion shops), other just take scrap fabric and write the basic information on it with permanent pen and fuse or stitch it onto the backing of the quilt. Here's the basic information, and other information that is always interesting for the buyer to know:

- Artist
- Contact Information (phone number/ website)
- Name of quilt
- Date Completed
- (For What Exhibition or Competition)
- (Techniques/Materials)
